Muhammad Talha

Backend Developer
Karachi, Pakistan | 0308-3167604 | talhazahid.se@gmail.com

PROFESSIONAL SUMMARY

Backend-focused Full Stack Developer currently pursuing a Bachelor's degree in Software Engineering at the University of Karachi. Strong in Python, Django, FastAPI, PostgreSQL, and REST API development, with hands-on experience building scalable backend systems, implementing authentication, and integrating third-party APIs. Also skilled in building responsive frontends with React and TypeScript, delivering complete end-to-end web applications. Quick learner with a strong interest in backend engineering, cloud technologies, and software engineering best practices.

TECHNICAL SKILLS

Backend: Django, FastAPI,Nodejs,Expressjs
Frontend: JavaScript,HTML,CSS ,React.js,TailwindCSS
Databases: PostgreSQL, MySQL
Languages: Python, JavaScript, Java, C++, HTML, CSS
Languages (Spoken): English, Urdu

EXPERIENCE

Backend-Focused Full Stack Developer | Academic & Personal Projects 2026 – Present

- Built REST APIs with authentication and role-based access control (RBAC) to manage user permissions.
- Worked with PostgreSQL, MySQL for data management and search functionality.
- Devloped Full Stack projects including a API Sentinel-API key Management Service,TaskManagement system.
- Collaborated in university team projects, improving debugging, problem-solving, and backend architecture skills.
- Built responsive frontends with React and Tailwind CSS and connected them to backend APIs.

PROJECTS

Task Management System | Personal Project(Full Stack) 2026

- Built a full-stack task management app where users register, create teams, and add members.
- Developed REST APIs for teams, task assignment, and user authentication.
- Designed a four-stage workflow board (To Do, Progress, Review, Completed) to track tasks from start to finish.
- Built a responsive frontend connected to the backend APIs.

API Sentinel | API-Key Management System(Full Stack) 2026

- Built a full-stack platform where developers can generate, rotate, revoke, and monitor API keys for their applications.
- Developed the backend REST APIs using Django REST Framework.
- Built the frontend using React and Vite, connected to the backend APIs

TalentRank AI | Resume Screening System(Backend) 2026

- Developed an AI-powered resume screening backend using Python, FastAPI, and PostgreSQL.
- Implemented resume parsing, skill extraction, Elasticsearch-based search, and candidate ranking features.
- Added JWT authentication, Google OAuth login, and role-based access control (RBAC).
- Integrated email notification system for user and recruiter communication.

Nearby Places Recommender | Personal Project(Backend) 2026

- Developed a location-based recommendation system to suggest nearby places and services.
- Implemented filtering and search functionality to improve recommendation accuracy.
- Worked with APIs and backend logic for handling location and recommendation data.

AI Chatbot Application | Personal Project(Backend) 2026

- Built an AI-powered chatbot application capable of handling user queries interactively.
- Integrated AI APIs for generating intelligent responses and conversation flow
- Focused on backend API handling, request processing, and chatbot response management.

EDUCATION

Bachelor of Software Engineering Jan 2025 – Dec 2028 University of Karachi
Intermediate – Pre-Engineering 2022 – 2024 Scholars Higher Secondary School
Matriculation – Science 2020 – 2022 Premier Grammar School
